Objective

AI-Driven Software Development and Agentic Coding — using autonomous AI agents to build, test, and deploy software. Preferred tools: **Claude Code**, **Cursor**, **Blitz** for enterprise scale, and **Claude Cwork** for research. Three decades of context across government contracting, defense, regulated industries, and financial services, applied to direct AI toward the right answers in domains where AI alone would build the wrong thing.

Recent Projects (2026)

leonsheet — A working Excel clone, vibe-coded in 3 hours · github.com/LeonardSibeliuss/leonsheet

26×100 grid spreadsheet with a hand-written formula language (tokenizer, recursive-descent parser, evaluator), dependency-graph recalc engine with Kahn's topological sort and natural cycle detection, SQLite persistence with WAL mode, and CSV import/export. Seven supported functions including SUM, IF (with fexpr-style short-circuit), and CONCAT. **245 passing tests in under one second**; seventeen bugs predicted before the first commit and proven absent by seventeen named tests. Build narrative in [Outwork #10](#) and engineering retrospective with code excerpts in [Outwork #11](#).

orders-pipeline — Postgres → Camel → Kafka integration pipeline ·

github.com/LeonardSibeliuss/orders-pipeline

Senior-Java demonstration of Apache Camel 4 **without Spring or Spring Boot** on the classpath. Atomic-claim concurrency via UPDATE ... RETURNING wrapping SELECT ... FOR UPDATE SKIP LOCKED for multi-instance safety; DLQ-first error handling through Redpanda/Kafka; live operator dashboard in HTMX + Tailwind with no build step; v1.3 added a stuck-row reaper route and Reclaim Activity panel with 24-hour sparkline. camel-main standalone runtime, HikariCP, docker-compose dev stack. Conventional-commits build journal across v1.0 → v1.3; full retrospective published in [Outwork #7](#).

Outpost Intelligence — Founder & sole operator

Four-agent AI intelligence system on the Claude Developer Platform: **Scout** (research across ClinicalTrials.gov, bioRxiv, SEC EDGAR, conference abstracts), **Prospector** (commercial opportunity scoring), **Reacher** (multi-channel content), **Writer** (executive-briefing synthesis). Subscription product live at outpostintel.com (\$100/month). Twenty-nine newsletter issues published across the *Outwork*, *Outlast*, and *Outwit* publications; full architecture documented in *Outwork #5: One Person Plus Four AIs*.

Professional Experience

Software Engineer — SAIC and DMI

May 2022 – May 2026 · Remote from Fernley, NV

Built data extraction system gathering data from the Army ARISS system for loading into the AIE Recruiting System on the SOOP contract. Maintained Army Recruiting Support Branch online form systems built with Adobe Designer posting to Sybase via a Java back end, including online recruit-signature workflows. Held Secret clearance and CompTIA Security+ certification.

Software Engineer III — Scientific Games

May 2007 – December 2017 · Reno, NV

Enhanced and maintained the Java Data Warehouse archiving and reporting module of the SDS Casino Slot Floor Management system, deployed in roughly **60% of the largest casinos worldwide** and used to satisfy regulatory reporting requirements for the Nevada Gaming Control Board, Canada, Macau, UK, Slovenia, and other jurisdictions. Owned the full DevOps cycle. Database: IBM DB2.

Senior Software Developer — SAIC and Northrop Grumman

October 2005 – May 2007 · San Diego, CA

Owned the full DevOps cycle for the Probation Case Management System for the County of San Diego — a Java web application used by **1,400 probation officers and staff** across the complete probation lifecycle. Legacy J2EE / JSP / JavaScript / EJB 2.0 stack on Weblogic / Solaris / Oracle. Worked directly with probation officers on incident resolution, enhancements, builds, and production deploys.

Software Engineer — Northrop Grumman

February 2002 – October 2005 · San Diego, CA

Full DevOps cycle on the Navy EFH Family Housing system — Java web applications managing occupancy, inventory, Bachelor Quarters, and third-party off-base housing across **82 Navy bases worldwide**. Oracle databases.

Software Engineer — Peregrine Systems

November 2000 – October 2001 · San Diego, CA

Developed server-side JavaScript modules now embedded in Hewlett Packard's Business Technology Optimization product line. Microsoft SQL Server.

Software Engineer — Alliance Consulting (subcontracted to IBM Global Services / Motorola)

November 1999 – August 2000 · Tempe, AZ

Built the Product Catalog and Partners collaboration system for Motorola's custom-built chips business. Java servlets rendering non-HTML engineering documents through a web browser; secured site for partner document collaboration; InfoSeek search integration. WebSphere on Solaris; IBM DB2.

Software Engineer — Seagate Technology

April 1999 – November 1999 · Bloomington, MN

Researched Java web application frameworks; developed Java servlets and infrastructure code for Seagate Sales and Marketing on Solaris.

Software Engineer — CDI Global Staffing Services (contract at IBM)

February 1997 – April 1999 · Rochester, MN

Maintained the server-management layer of a distributed programming framework that served as the prototype for EJB 1.0. Wrote Java code managing distributed-object communication, persistence, client-service binding, and thread/process tracking, extending Java RMI. AS400 with IBM DB2.

Financial Systems Analyst — SAIC

March 1992 – October 1996 · San Diego, CA

Wrote planning and budgeting software tracking all government-billed costs on the **\$1.2 billion** military Health Care Technology Group Composite Health Care System. Built estimating, pricing, and accounts-receivable systems on Oracle 7.1 / DEC VAX. Received SAIC Special Performance Award.

Skills & Tools

AI & Agentic Tools. Claude Code, Cursor, Blitzy, Anthropic Managed Agents, Model Context Protocol (MCP), multi-agent orchestration, agentic workflows, prompt engineering

Languages. Java (Java 8 through 21), Python, JavaScript / Node.js, SQL, Bash

Databases. Sybase ASE, Postgres, Oracle, IBM DB2, Microsoft SQL Server

Frameworks & Protocols. Apache Camel 4 (camel-main, camel-sql, camel-kafka, camel-jackson), HikariCP, Apache Kafka / Redpanda, J2EE / EJB, JDBC (jConnect, jTDS), Java RMI, Flask, REST APIs, SFTP / SSH, Apache MINA SSHD, Bouncy Castle

Platforms & Deploy. Solaris, Weblogic, WebSphere, AS400, Render, Docker / docker-compose, Linux, Windows Server

Government & Compliance. Secret clearance (verify status), CompTIA Security+, defense contracting, regulated-industry development (gaming, government, healthcare)

Public Work. Outwork, Outlast, and Outwit newsletters (twenty-nine published issues across longevity intelligence, AI agent stacks, and federal fraud-ring analysis); osteosarc.com diagnostic reproducibility advocate
